What Makes Masy Calibration Services Different

Masy Systems believes that there are three things to consider when evaluating Calibration Service Providers: *Quality, Turnaround time and Pricing.* Some calibration labs offer 2 out of the 3, but we offer the complete triad.

Quality Our calibration lab is NVLAP Accredited and our company is ISO 9001 Certified, so quality is critically important to us.

Turnaround Time Masy offers the fastest turnaround times in the industry (typically 2-3 days).

Pricing We offer competitive pricing and challenge you to compare us to other accredited labs.

Our fixed point temperature standards are hand carried and certified directly by NIST which sets us apart from other NVLAP accredited laboratories.

We can calibrate your...

Primary Standards

SPRTs by
Fixed Point or Comparison

Thermometer Readouts

Handheld Thermometers
Benchtop Thermometers

Sampling of Manufacturers:
FLUKE /HART ISOTECH MARTEL OMEGA Others

Loop Calibration of Thermometer Readouts w/Probes

Thermometer Probes

Secondary Standard PRTs
Secondary Reference PRTs
Secondary PRTs w/calibration options
Small Diameter Industrial PRTs
Precision Freezer PRTs
Precision Industrial PRTs

Fast Response PRTs
RTDs
Thermistor Standards
Secondary Thermistor Probes
Thermocouples

NVLAP ISO/IEC 17025:2005 Accredited

Accredited for calibrations by the National Voluntary Laboratory Accreditation Program (NVLAP).

Scope includes temperature, voltage and resistance measurements, including the ability to perform 17025 accredited calibrations of dataloggers, temperature standards and dry well temperature baths.

NVLAP LAB CODE 200904-0

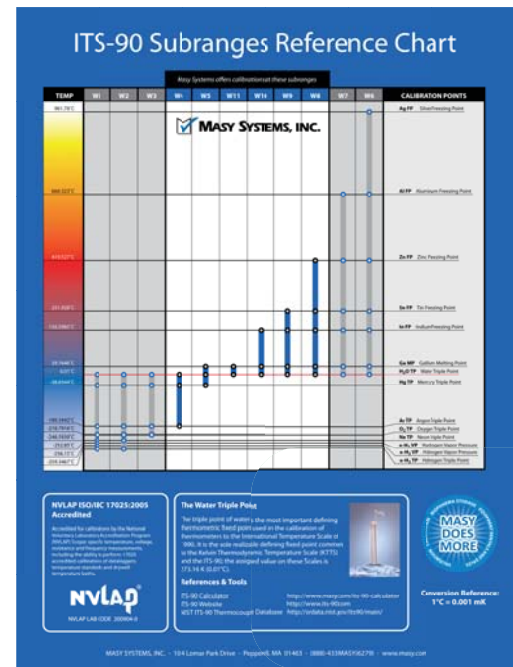

In-House cGMP Calibrations

Masy System provides in-house calibration services that meet cGMP requirements, which assure adequate and continuous performance of measurement equipment with respect to accuracy and precision, resulting in equipment that is both safe and effective.

Performing a full verification provides critical information that many of our customers have requested to support the accuracy requirements of their instruments. Our calibration certificates not only include as found and as left data, but also verification that the probe is in tolerance at the full range of temperatures.

Masy Systems NIST Certified ITS-90 Fixed Point Cells

660.323 °C	Aluminum Freezing Point
419.527 °C	Zinc Freezing Point
231.928 °C	Tin Freezing Point
29.7646 °C	Gallium Melting Point
0.01 °C	Water Triple Point
-38.8344 °C	Mercury Triple Point
-189.3442 °C	Argon Triple Point

On-Site cGMP Calibrations

Masy System provides on-site cGMP calibration services at your location, scheduled at your convenience, to ensure minimal interruption at the optimum time to suit your needs. All calibrations are traceable to NIST and include as found and as left data.
